The benefits of physical activity
How The Daily Mile can help
Taking part in regular physical activity has lots of benefits for children’s physical health, mental health and wellbeing, and their learning.1

- It improves bone health and muscle strength in children.2
- It enhances fitness and improves heart health.3, 4
- It reduces body fat and promotes healthy body composition.4, 5
- It supports self-esteem and happiness.6, 7, 8
- It helps reduce anxiety and increases confidence.9, 10
- It improves focus and concentration11 and can help improve classroom behaviour.12
- It improves memory function, maths problem solving and performance.13, 14
- It supports improved academic attainment15 and cognitive performance.16, 17, 18

The benefits of being active are clear but we know that one third of children are active for less than 30 minutes a day.19 Global recommendations from the World Health Organisation outline that children should be doing 60 minutes of physical activity every day.20

The Daily Mile is a simple and free initiative for schools and nurseries. Children run or jog at their own pace, for just 15 minutes every day, outside with their friends. There’s no extra workload for teachers, and no need for kit or special equipment - children take part in whatever they’re wearing.

More than 11,000 schools are already registered for The Daily Mile in 78 countries. A growing network of researchers around the world are studying the benefits of The Daily Mile. The emerging research has been published in many academic journals and online too. Schools and teachers like The Daily Mile because it’s simple to implement, flexible and works in a variety of settings.21 We also know that The Daily Mile has lots of benefits for children’s physical health and wellbeing, mental health and wellbeing, and their learning:

... physical health and wellbeing
- The Daily Mile helps children be more active and less sedentary22, 23 and significantly increases their fitness levels.22, 24, 25, 26, 27
- The Daily Mile improves children’s body composition by reducing body fat22, and has a positive impact on body mass index in girls.28

... mental health and wellbeing
- Children report feeling happier, more awake and calmer after doing The Daily Mile27, 29, 30 and improves attitudes towards physical activity.27
- Teachers report that The Daily Mile improves teacher-child and peer-to-peer relationships.27, 31, 32

... learning
- The Daily Mile increases children’s alertness and can help increase verbal memory - these skills enhance children’s ability to learn.30
- Teachers report that The Daily Mile helps children’s attention, focus and concentration in class31, 32, 33, 34 and its social nature supports children to work better together.27, 35
